### **Description of Classes**

**Keys to Full Swing Success** - This class offers insight into the key elements of Full Swing Success including aim, routine and set-up. You will learn how to better utilize the elements of the swing and parts of the body that contribute to creating more distance and improved accuracy.

**Chipping and Putting** - A must class for golfers of all abilities. The short game makes up two thirds of the number of strokes you take during a round of golf. This class will help you tune in to the target better by focusing on proper setup, stroke and distance control.

**Sand Shots and Pitching** - This class focuses on the other half of the short game. You'll learn to like the sand and gain confidence in hitting those nice high short shots to the green.

**How to Bring it to the Course** - Learn how to find success on the course by focusing on setting goals, preshot routine, sound decision-making, and course management. A must follow-up to any of our Special Tee classes
